MACHEREY-NAGEL

QUANTOFIX® Relax
Automated reader for test strips

Perfect vision · Exact results

- Highest precision
- Objective readings
- Easy result administration

**QUANTOFIX® Relax**

- **A revolution in test strip analysis**

The QUANTOFIX® Relax is a revolutionary step in test strip analysis. With this new system, MACHELEY-NAGEL offers an entirely objective way to read QUANTOFIX® test strips, making the system particularly suitable if results are critical to your decision making. The system simplifies testing procedures and the decision processes by eliminating the subjectivity of visual readings and by providing higher accuracy. Especially if you test large numbers of strips, the QUANTOFIX® Relax helps and supports you with easy data administration and quick testing procedures. Additionally, the QUANTOFIX® Relax allows you to get actual quantitative results – no gradation and estimation of in-between values is necessary.

The QUANTOFIX® Relax can change the way you work and test. The system enables you to focus on your core processes and is the perfect tool for your testing procedures.

**Highest precision**
- Quantitative results across the complete measuring range
- Higher accuracy and no in-between value guesswork
- Assure your decision making

**Objective readings**
- No influence of external light or human color perception
- Reproducible results independent of the operator
- Increase safety and comfort

**Easy result administration**
- Immediate printouts
- Data can be transferred to a computer
- Save time to focus on your core business
QUANTOFIX® Relax

■ Optimized usability

Auto Start
Select the test, dip the strip and place it on the instrument. Without pressing any further button, the instrument starts the measurement automatically. Thus, operating is clean and easy.

Graphic display
The graphic display shows all relevant information at a glance. The result is given with a test specific confidential interval. Thus, you can easily decide which further steps are needed for your process.

Touch screen
The touch screen makes using the instrument a real pleasure. All functions are easily accessed with a dip on the screen. You can also enter sample IDs with the on-screen keypad or an external keyboard. This makes documentation of results safe and easy.

Interface options
The instrument features a USB as well as an RS 232 interface. It can easily be connected to existing laboratory information systems and also to PCs.

Printer
The result is printed using a fast and silent internal printer. Thus, you can easily staple the results to production files for later check or QC procedures.

Easily change tests
With just two taps on the screen you can quickly change between your favorite tests. Select five different tests as your favorites out of a large variety of tests programmed into the instrument. All information is already programmed so you can immediately start the measurement when needed.

Memory for 200 measurements
Up to 200 measurements can be stored. Using internal functions, positive readings are easily filtered out, enabling further diagnosis whenever necessary.

Take account of matrix interferences with the user specific calibration adjustment function.
Test strips for QUANTOFIX® Relax

The following tests are calibrated on the instrument and can be run with the instrument’s software. Additional tests will be added to the instrument successively based on customer demand. If you are interested in a specific test for the QUANTOFIX® Relax, please contact your local distributor or MACHEREY-NAGEL directly.

Together with the QUANTOFIX® Relax, test strips may not be used for any medical application.

* This product contains harmful substances which must be specially labeled as hazardous. For detailed information please see MSDS.

Technical specifications QUANTOFIX® Relax

Instrument memory
- 200 test results including sample ID

Interface
- User: Touch screen, alphanumerical input, password protection
- Computer: USB and RS 232 interface for connection to PC, PS/2 interface for connection of keyboard or barcode scanner

Dimensions / Weight
- Depth: 20 cm (7.9 inches)
- Width: 16 cm (6.3 inches)
- Height: 7.5 cm (3.0 inches)
- Weight: 710 g (1.90 lb), (w/o batteries and power supply)

Power requirements
- 110–240 V AC, automatic
- Battery powered operation (optional) with 6 AA batteries

Operating conditions
- Temperature range: 10 °C–40 °C (50 °F–104 °F)
- Humidity range: 80 % maximum (non condensing)
- Calibration: automatic, self calibrating

Capacity
- 50 strips per hour
